

FINAL EXAMINATION

Semester	:	MAY 2024 SEMESTER
Programme Name	:	DIPLOMA IN BUSINESS STUDIES DIPLOMA OF ACCOUNTANCY DIPLOMA IN E-BUSINESS
Course Code & Name	:	DBFN3013 I DEB1333 BUSINESS FINANCE
Duration	:	3 HOURS

INSTRUCTIONS TO CANDIDATES:

1. Please read the instructions given in the question paper **CAREFULLY**.
2. The question paper consists of **FOUR (4)** questions.
3. Answer **ALL** questions in the question paper.
4. Answers to the questions are to be written into the examination booklet.
5. Electronic dictionaries, lecture notes, files or any unauthorised materials except writing equipment are strictly prohibited.

This question paper must be submitted along with all used and/or unused rough papers and/ or graph papers (if any). Candidates are **NOT ALLOWED** to take any examination paper(s) used or unused out of the examination hall.

WARNING:

The Examination Board of Peninsula College Georgetown regards cheating as a very serious offence and will not hesitate to mete out the appropriate punitive actions according to the severity of the offence committed, and in accordance with the clauses stipulated in the Students' Handbook, up to and including expulsion from Peninsula College Georgetown.

(This booklet contains 8 printed pages including this page)

DO NOT OPEN THIS BOOKLET UNTIL YOU ARE ALLOWED TO DO SO

Answer **ALL** questions on the separate sheet provided.

[100 marks]

1. a) List **FIVE (5)** potential sources of financing for SME's. (5 marks)

 - b) Explain **FIVE (5)** characteristics of SMEs. (10 marks)

 - c) Discuss **THREE (3)** advantages of factoring and **TWO (2)** disadvantages of factoring. (10 marks)
- Total: [25 marks]
-
2. a) John is planning a savings program for his 15 years old son. He plans to enroll his son at the university in 4 years and it should take him 3 years to complete his education. The cost of education per year at university is RM10000 , payable at the beginning of each year. His son recently received RM6500 from his mothers estate and this money will be invested in a bank account that paying four percent of interest compounded annually. The money will be used to help to meet the cost of the son's education. Once the son reaches age 19, the sum of this money will be transferred to fathers savings account and the rest of the cost will be met by money the father will deposit in his savings account. However, he will make 5 equal deposits to the account , one deposit in each year from now until his son starts university. These deposits will begin and will earn 6 percent interest, compounded annually.
 - i) Calculate the present value of the cost of 3 years of education at the time the son becomes 19 years old . (5 marks)
 - ii) Calculate the future value of RM6500 which the son received from his mother's estate when he starts university at age 19. (5 marks)
 - iii) Let say the father is planning to make the first of 5 deposits today, calculate how large must each deposit be for him to be able to put his son through university. (5 Marks)

 - b) Find the effective rate of interest corresponding to a nominal rate of 8 percent per annum compounded
 - i) Annually (1 mark)
 - ii) Semi-annually (1 mark)
 - iii) Quarterly (1 mark)
 - iv) Monthly (1 mark)
 - v) Daily (1 mark)

 - c) Mr. Prasant invests RM 500, RM 1000, RM 1500, RM 2000 and RM 2500 at the end of each year. Calculate the compound value at the end of the 5th year, compounded annually, when the interest charged is 5% per annum. (5 marks)

Total: [25 marks]

3. Extract from the recent financial statement of Gemilang Automotive is shown below.

		2023 (RM'000)	2022 (RM'000)
Sales		31200	22000
Cost of Sales		<u>18600</u>	<u>13200</u>
Gross Profit		12600	9000
Administration expenses		<u>2000</u>	<u>1500</u>
EBIT		10600	7500
Interest		<u>200</u>	<u>30</u>
Earning before Tax		10400	7470

Balance Sheet as of 31st December 2023

	2023		2022	
	RM'000	RM'000	RM'000	RM'000
Fixed asset		11,500		10,800
Current Assets:				
Inventory	6000		2600	
Account Receivable	7600		3700	
Cash	240	<u>13,840</u>	1800	<u>8,100</u>
Total Assets		25,340		18,900
Current Liabilities:				
Account Payable	5740		3200	
Overdraft bank	2000		300	
Total Liabilities		7740		3500

All sales purchases were on credit. Gemilang Automotive has no long-term debt.

- a) Calculate the operating cycle and the cash conversion cycle for Gemilang Automotive for the year 2023 and 2022.

(14 marks)

- b) Explain **THREE (3)** methods of reducing the working capital cycle .

(6 marks)

- c) Zana sells 120000 sets of fittings a year. The optimal safety inventory which is on hand initially is 600 sets. Each set purchase price is RM2, which inventory carrying costs are 20 percent of purchase price, and the cost of placing an order with its supplier is RM 12.50.

Calculate the economic order quantity (EOQ).

(5 mark)

Total: [25 marks]

4. Gara construction company Ltd is considering either AT10 machines or NN2 machines for their upcoming projects. The following information shows expenditures and net cash flow for the machines.

Years	AT10 Machines (RM)	NN2 Machines (RM)
0	(200000)	(210000)
1	95000	91000
2	100000	109000
3	105000	110000
4	110000	110000
5	110000	115000

At the end of their useful lives, the AT10 machines are expected to have a scrap value of RM5000 and the NN2 machines RM 6500. The tax rate is 30 percent per annum. The required rate of return is 14 percent. Calculate :

- a) The payback period (4 marks)
- b) The Net Present Value (NPV) (10 marks)
- c) The Profitability Index (PI) (3 marks)
- d) If the two machines should be repaired in year 4 at 5 percent of its original price , calculate the new NPV.

(8 marks)
Total: [25 marks]

- END OF QUESTIONS -

Formula

CCC (in days) = Inventory conversion period + receivable collection period - payable deferral period

TIME VALUE OF MONEY

Lump-sum (single) payments:

$$FV_n = PV(1+r)^n$$

$$PV = \frac{FV_n}{(1+r)^n} = FV_n \left[\frac{1}{(1+r)^n} \right]$$

Annuity payments:

$$FVA_n = PMT \left[\sum_{t=0}^{n-1} (1+r)^t \right] = PMT \left[\frac{(1+r)^n - 1}{r} \right]$$

$$FVA(DUE)_n = PMT \left\{ \left[\sum_{t=0}^{n-1} (1+r)^t \right] \times (1+r) \right\} = PMT \left[\left\{ \frac{(1+r)^n - 1}{r} \right\} \times (1+r) \right]$$

$$PVA_n = PMT \left[\sum_{t=1}^n \frac{1}{(1+r)^t} \right] = PMT \left[\frac{1 - \frac{1}{(1+r)^n}}{r} \right]$$

$$PVA(DUE)_n = PMT \left\{ \sum_{t=1}^n \left[\frac{1}{(1+r)^t} \right] \times (1+r) \right\} = PMT \left[\left\{ \frac{1 - \frac{1}{(1+r)^n}}{r} \right\} \times (1+r) \right]$$

Perpetuities:

$$\text{Present value of a perpetuity} = PVP = \frac{\text{Payment}}{\text{Interest rate}} = \frac{PMT}{r}$$

Uneven cash flow streams:

$$FV CF_n = CF_1(1+r)^{n-1} + \dots + CF_n(1+r)^0 = \sum_{t=0}^{n-1} CF_t(1+r)^t$$

$$PV CF_n = CF_1 \left[\frac{1}{(1+r)^1} \right] + \dots + CF_n \left[\frac{1}{(1+r)^n} \right] = \sum_{t=1}^n CF_t \left[\frac{1}{(1+r)^t} \right]$$

Capital Budgeting

Evaluation techniques:

$$\text{Payback} = \left(\text{Number of years just before full recovery of original investment} \right) + \left(\frac{\text{Amount of the initial investment that is unrecovered at the start of therecovery year}}{\text{Total cash flow generated during the recovery year}} \right)$$

Traditional payback—unadjusted cash flows are used

Discounted payback—discounted cash flows, or present values, are used

$$\text{NPV} = \text{CF}_0 + \frac{\hat{\text{CF}}_1}{(1+r)^1} + \dots + \frac{\hat{\text{CF}}_n}{(1+r)^n} = \sum_{t=0}^n \frac{\hat{\text{CF}}_t}{(1+r)^t}$$

$$\text{CF}_0 + \frac{\hat{\text{CF}}_1}{(1+\text{IRR})^1} + \dots + \frac{\hat{\text{CF}}_n}{(1+\text{IRR})^n} = \sum_{t=0}^n \frac{\hat{\text{CF}}_t}{(1+\text{IRR})^t} = 0$$

IRR = internal rate of return

$$\text{MIRR: } \text{PV of cash outflows} = \frac{\text{FV of cash inflows}}{(1+\text{MIRR})^n} = \frac{\text{TV}}{(1+\text{MIRR})^n} ; \quad \sum_{t=0}^n \frac{\text{COF}_t}{(1+r)^t} = \frac{\sum_{t=0}^n \text{CIF}_t (1+r)^t}{(1+\text{MIRR})^n}$$
